

Gone Fishing

Do you know all the details of the fishing trip? Please make sure that you know, and have written down, and stuck on the fridge, the following information:

- Where are they going to fish?
- What time are they coming back?
- The boat's name and registration
- The colour of the boat – inside and the bottom
- How many engines are on the boat?
- What size is the boat?
- How much petrol they have on board
- What safety equipment they have on board
- What protective clothing they have with them
- What communications they have, if any

If you are worried that haven't returned when they said they would, phone Sea Rescue (082 911). They would much rather be alerted sooner and discover that your loved ones are still fishing happily, than wait too long, and not find them at all.
